

## SENIOR GEOLOGIST - RASP PROJECT BROKEN HILL

CBH Resources is a diversified and expanding base metal mining group with specific operations at the Endeavor Mine in Cobar; the Rasp Mine and Project at Broken Hill and the Panorama Green Field Project in the Pilbara Region of Western Australia.

The position is for a Senior Geologist at the Rasp zinc and lead project at Broken Hill in New South Wales. This is a senior project position with the successful candidate being a key member of the operations team. The position reports to the Manager Mining of the Rasp project.

The successful candidate will have 5 to 10 years experience in mine geology, strong communication skills and well developed skills in 3D modelling software (eg: Vulcan, Surpac etc).

The Principal responsibilities for the Senior Geologist will include:

- Provide overall management of the Geology Department.
- Geological interpretation and input into the project planning of the underground development, production drilling, stope production and mine scheduling.
- Providing up to date geological and resource block model data base to aid the project planning, exploration and ore reserve reporting.
- Exploration for new reserves within the mine lease.
- Development of future exploration programs and subsequent monitoring of drilling, sampling, exploration, core yard crews and supervisors in accordance to statutory requirements, safety and environmental policies.
- Ensuring the highest standards of documentation and reporting of all aspects of geology.

To help attract the highest quality candidate, CBH will offer an attractive salary and other employment conditions.

Applicants should send their resume, detailing their qualifications, employment history and other relevant information to the Group Human Resources Manager at:
