 - 4.1 In our first statement, we strengthened our commitment to understanding modern slavery risks in our operations and supply chains. CBH Resources' Australian operations span across New South Wales. We source products and supplies from Australian and International suppliers, who in turn have local and international supply chains.
 - 4.2 We acknowledge that the risks of modern slavery may be heightened in some of our groups supply chains and operations as a result of the geographical location of some suppliers, our areas of operation, and the source of materials used in products supplied to us. We also acknowledge that, we lack visibility in certain overseas markets and this carries additional risks of modern slavery especially in secondary levels of our chain of suppliers and source materials used in our group's goods and services. We continued to work to identify and ultimately minimise those risks.

5. Actions taken to assess and address modern slavery risk

Our approach and progress

- 5.1 In 2021, we reviewed and strengthened our modern slavery practices and policies with a particular focus on educating employees at all levels in relation to identifying modern slavery and what CBH can do to combat modern slavery.

- 5.3 During this reporting period, our focus was to gain a better understanding of our modern slavery risks and how such risks may be present in our operations and supply chains. At this early stage, we are unable to adequately assess the effectiveness of measures we have undertaken. However, we have commenced and will continue to work on developing frameworks and processes to ensure we can review the effectiveness of the actions we are taking to assess and address modern slavery risks in our operations and supply chains.
