## MEDIA RELEASE

**CBH RESOURCES 17<sup>TH</sup> JULY 2019**

### **CBH to Cut Production at Endeavor Mine**

Following a review of operating strategies at its Endeavor Mine in Cobar, CBH is today announcing a cut in production and a reduction in its current workforce. This comes as a result of on-going cash losses through 2019 as the orebody comes towards the end of its current reserve.

Production will be reduced to a minimum level of approximately 17,000t/month for the remainder of 2019 while at the same time partially completing infill drilling of the inferred Deep Zinc Lode Resource to better appraise its future viability.

The current workforce of 161 full time CBH employees plus 40 contractors will be cut by 130 people to a level of 71 people.

This decision has not been taken lightly. In the coming days we will consult with all our employees and put in place support services to assist people who are affected as a result of these changes.
